PROFESSIONAL SUMMARY

Full-Stack Developer with 4 years of experience building and maintaining SaaS products in startup environments. Strong foundation in React, TypeScript, and Node.js, with experience across Express and NestJS. Owns features end-to-end, from design to production, making technical decisions across the frontend, API gateway, and microservices. Experienced integrating third-party services (Stripe, Persona, SSO, AWS) and building AI-powered features. Pragmatic about clean, maintainable code, performance, and collaborative Agile delivery.

EXPERIENCE

WeCheck AI - Remote (Miami, FL, USA)

Full-Stack Developer

Oct 2023 - Present

- Own product features end-to-end across the React/TypeScript frontend, the NestJS/Express API gateway, and the underlying microservices (4 to date), owning technical decisions from evaluation to production rollout.
- Reduced processing time and operational costs by over 50% on an internal AI microservice by integrating the Vercel AI SDK and Langfuse for LLM tracing.
- Designed and shipped an automatic PDF generation service with Express and react-pdf, used daily by operational teams to deliver reports to B2B clients.
- Integrated third-party services across the platform: Stripe (payments), Persona (identity verification), SSO providers (auth), and third-party scrapers for data enrichment.
- Integrated AWS services (S3, SNS, AWS Secrets Manager, Amazon Rekognition, IAM) and managed deployments on Railway.
- Implemented tracing using Sentry (errors), PostHog (product analytics across user flows and wizards), and Langfuse (LLM tracing).
- Collaborated with design and product to deliver features from spec to production; shipped hotfixes that kept operational teams unblocked in real time.
- Performed code reviews and legacy refactors to improve performance and maintainability across the stack.
- Built and maintained the company's main website and internal back-office, plus a mobile app for Android and iOS using React Native (Expo).

Stack: React, TypeScript, Next.js, React Native, NestJS, Express, Node.js, MongoDB, AWS, Docker, Tailwind CSS, shadcn/ui, react-pdf.

GOL BALL - Remote (Miami, FL, USA)

Frontend Developer

Jan 2023 - Sep 2023

- Built and maintained an internal back-office for product and user management; fixed bugs, improved UX/UI, and contributed to code reviews.

Stack: React, TypeScript, JavaScript, Redux, Tailwind CSS, Material UI, Git.

TECHNICAL SKILLS

- **Languages:** TypeScript, JavaScript, Python, SQL, HTML, CSS
- **Frontend:** React, React.js, React Native, Next.js, Redux, Tailwind CSS, Material UI (MUI), shadcn/ui, Bootstrap, react-pdf, Responsive Design, SPA, SSR
- **Backend:** Node.js, NestJS, Express, FastAPI, REST APIs, RESTful APIs, Microservices, API Gateways
- **Testing:** Jest, React Testing Library
- **Databases & BaaS:** MongoDB, PostgreSQL, Supabase, Firebase
- **Observability & Analytics:** Sentry, PostHog, Langfuse
- **Cloud & DevOps:** AWS, Railway, Docker, GitHub Actions, CI/CD, Vercel, Deployment Pipelines
- **AI / LLM Tooling:** Vercel AI SDK, Langfuse, LLM integrations
- **Version Control & Tooling:** Git, GitHub
- **Methodologies:** Agile, Scrum, Code Reviews

EDUCATION

Universidad Tecnológica Nacional (UTN) - Programming Technical Degree (Tecnicatura en Programación) | Feb 2026 - Present

Escuela Secundaria N° 3 - High School Diploma, Economics | 2013 - 2019
