PROFESSIONAL SUMMARY

Full-Stack Developer with 4 years of experience building and maintaining SaaS products in startup environments, working fully remote from Argentina (UTC-3 time zone). Owner of product features end-to-end, from design handoff to production, making technical decisions across the React/TypeScript frontend, the NestJS/Express API gateway, and the microservices behind them. Experienced integrating third-party services (Stripe, Persona, SSO, AWS) and building AI-powered features (Vercel AI SDK, RAG). Pragmatic about clean, maintainable code, performance, and collaborative Agile delivery.

EXPERIENCE

WeCheck AI · Remote (Miami, FL, USA)

Full-Stack Developer | Oct 2023 – Present

- Own product features end-to-end across the React/TypeScript frontend, the NestJS/Express API gateway, and the microservices that support them (4 to date), owning technical decisions from evaluation to production rollout.
- Proposed, designed, and built an improvement to an internal AI microservice that cut processing time and operational costs by over 50%, using the Vercel AI SDK and Langfuse for LLM tracing.
- Designed and shipped an automatic PDF generation service (Express + react-pdf) that dynamically builds styled reports with charts and rendered images, translating Figma designs into react-pdf components and CSS; used daily by operational teams to deliver reports to B2B clients.
- Integrated third-party services across the platform: Stripe (payments), Persona (identity verification), SSO providers (auth), and third-party scrapers for data enrichment.
- Integrated AWS services across microservices (S3, SNS, Secrets Manager, Amazon Rekognition, IAM) and managed deployments on Railway.
- Implemented observability and tracing with Sentry (errors), PostHog (product analytics across user flows and wizards), and Langfuse (LLM tracing).
- Collaborated closely with design and product to take features from spec to production; shipped hotfixes that kept operational teams unblocked in real time.
- Led code reviews and refactored legacy code to improve performance and maintainability across the stack.
- Built and maintained the company's main website and internal back-office, plus a mobile app for Android and iOS using React Native (Expo).

Stack: React, TypeScript, Next.js, React Native, NestJS, Express, Node.js, MongoDB, AWS, Docker, Tailwind CSS, shadcn/ui, react-pdf.

GOL BALL · Remote (Miami, FL, USA)

Frontend Developer | Jan 2023 – Sep 2023

- Built, designed, and maintained an internal back-office for product and user management, delivering a clean and usable UI/UX; fixed bugs and contributed to code reviews.
- Coordinated with the backend team and consumed REST endpoints from the frontend.
- Built reusable React/TypeScript components and collaborated with the team to improve the overall user experience.

Stack: React, TypeScript, JavaScript, Redux, Tailwind CSS, Material UI, Git.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, SQL, HTML, CSS

Frontend: React, React.js, React Native, Next.js, Redux, Tailwind CSS, Material UI (MUI), shadcn/ui, Bootstrap, react-pdf, Responsive Design, SPA, SSR

Backend: Node.js, NestJS, Express, FastAPI, REST APIs, RESTful APIs, Microservices, API Gateways

AI / LLM: Vercel AI SDK, RAG, embeddings, pgvector, Langfuse, LLM integrations

Databases & BaaS: MongoDB, PostgreSQL, Supabase

Infrastructure: AWS, Railway, Docker, GitHub Actions, CI/CD, Vercel

Observability: Sentry, PostHog, Langfuse

Testing: Jest, React Testing Library

Version Control: Git, GitHub

Methodologies: Agile, Scrum, Code Reviews

EDUCATION

Universidad Tecnológica Nacional (UTN) · Associate Degree in Computer Programming (Tecnatura Universitaria en Programación) | Feb 2026 – Present

Escuela Secundaria N° 3 · High School Diploma, Economics | 2013 – 2019

CERTIFICATIONS

EF SET English Certificate · 51/100 (B2 Upper-Intermediate) | Jul 2025

LANGUAGES

Spanish (Native) · English (Upper-Intermediate, B2)
